

THREE DIMENSIONAL STRUCTURE OF PARAMYXOVIRUS HEMAGGLUTININ-NEURAMINIDASES AND USE THEREOF

5

ABSTRACT OF DISCLOSURE

Novel paramyxovirus hemagglutinin-neuraminidase active site and methods for enabling the design and selection of inhibitors with that active site are provided. Also provided is machine-readable data storage medium comprising structure coordinates of the novel paramyxovirus hemagglutinin-neuraminidase active site.
